

# Legacy Landing Pages - Archive Templates

This article applies to:

With the Landing Page builder in Keap, you have the ability to archive your previous templates that are stored in the **Your Templates** section of the template selector. This feature is designed to assist with cleaning up your view of previous templates that you have created. Follow the steps below to archive previously created templates.

1. In the Advanced Automation Builder, drag in a Landing Page goal, and double click to enter the template selection screen.
2. From the left menu, select **Your Pages**

3. Click the ... button above a template that needs to be archived.

4. Click **Archive**

5. Confirm the selection by clicking **Yes, please**.
