# Legacy Landing Pages - Adding Anchors 🔗
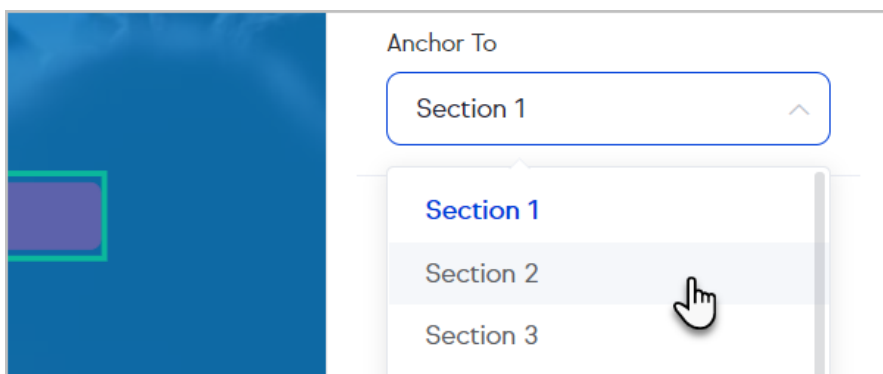

This article applies to:

1. Add a call-to-action button to your landing page. For example, you may have your lead capture form at the top of the page and want a call to action at the bottom of the page that quickly moves them back to the section that contains the web form.

2. Click on the button and choose **Anchor to a section**.

3. Then click on the section you would like to anchor to.

4. Now, when someone clicks this button, it will move them to that section of the Landing Page.
