How to configure your Billing Settings

This article applies to:

From **Billing Settings** you can configure your currency settings, setup a merchant account, and create, edit, or delete products.

1. Navigate to Settings

2. Once there, click "Billing Settings"
Currency Settings

- Use the billing currency setting to select the currency format and symbol that your customers see. When your customer makes a payment, the currency format and symbol will match the currency they are being charged in. Click here to find out more.

Payment Processing

- Sign up with Infusionsoft Payments so that you can accept payments by clicking "Get Started", to find out more click here.

- You can also click "Add another payment processor" to configure Authorize.net, to find out more click here.
Products and services

- Click "Add a product or service" to create a product
- Click "Edit" to make changes or delete an existing product.
