Making a call with your Keap Business Line

This article applies to:

Use your Keap Business Line to make calls to saved contacts or new numbers.

1. To make outbound calls you can navigate to a contact record that has a phone number saved. Note: Keap Business Line can only make and receive calls from U.S. or Canadian numbers.

   ![Contact Record]

   **NOTE**: if no phone number is saved then you will see a grayed out call button on the contact record.

2. Tap on the call button.

   ![Call Button]

3. You’ll see a page and a dialogue that has the option to Call or Cancel.
NOTE: You may notice that the phone number that shows up on the outbound call is different than your contact’s phone number. This phone number is your routing number that makes the call to your contact’s phone number using your Keap Phone number.
