

# Form Submitted goal

This article applies to:

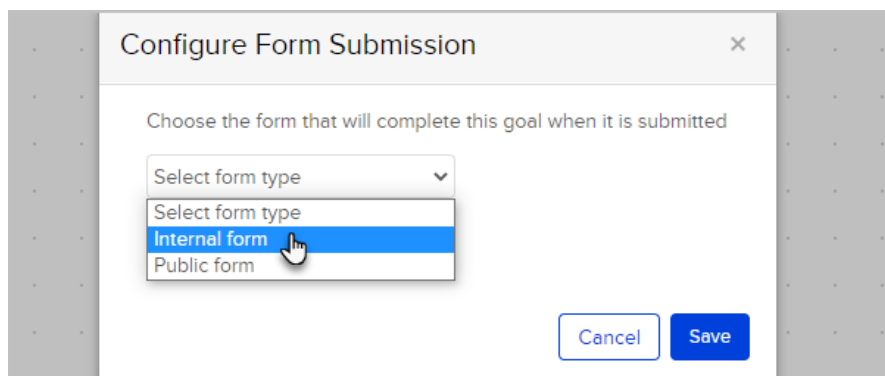

Kick off automation when you submit an [internal form](#) or when someone fills out your [public form](#) with the **Form submitted** goal. You can also use custom form fields and [decision diamonds](#) to build even more advanced automation.

1. Drag the Form submitted goal from the sidebar menu onto the canvas

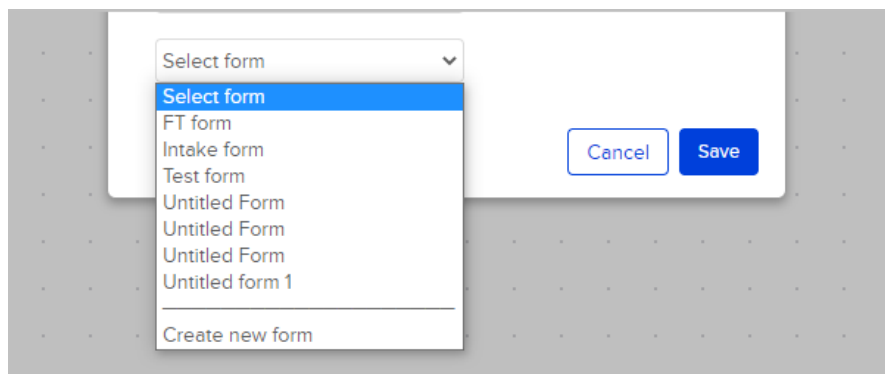

2. Double-click the Form submitted goal on the canvas to configure it

3. Select which type of form will trigger the goal

4. Choose a form or create a new one

**Note:** If you create a new form, you must **Save and publish** the new form in order to use it

5. Click **Save**

6. Drag a sequence onto the canvas and start building your automation
