

# Pipeline: Multiple Pipelines

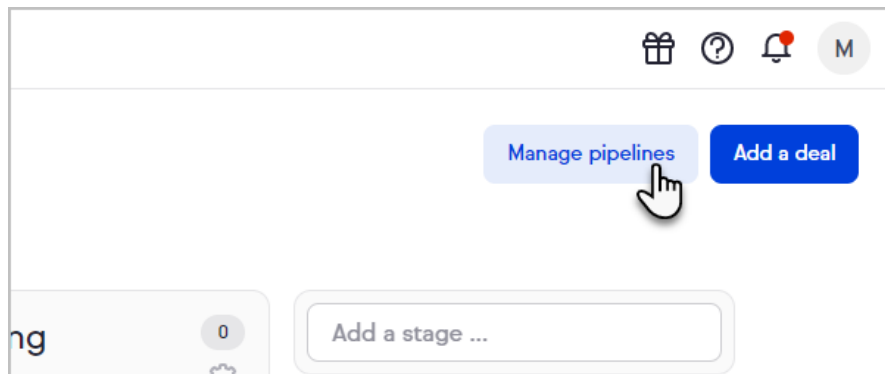

This article applies to:

## Create a new pipeline

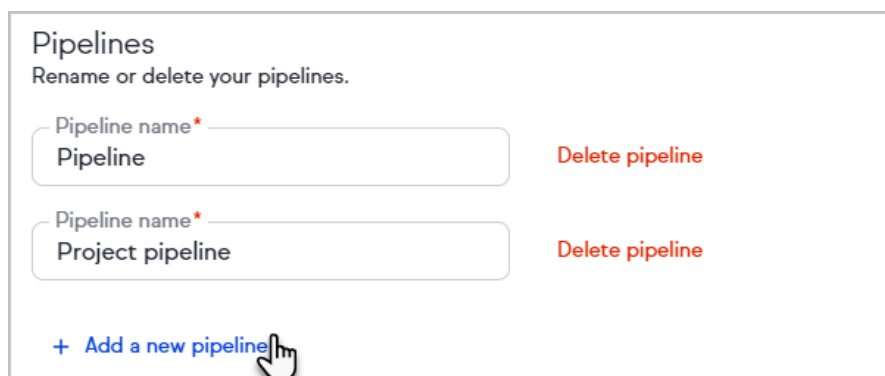

1. Start by going to your **Pipeline** page

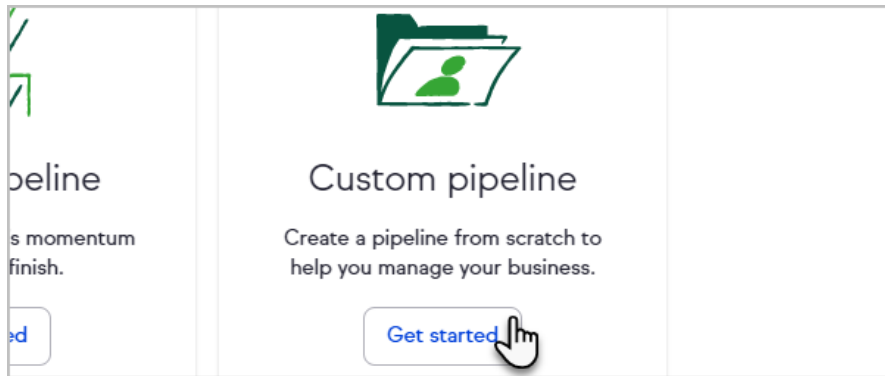

2. Click **Manage pipelines** at the top right of the page

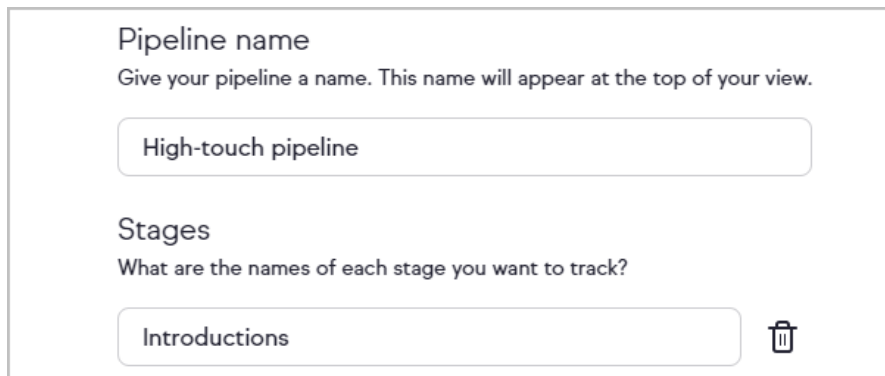

3. Click **Add a new pipeline**

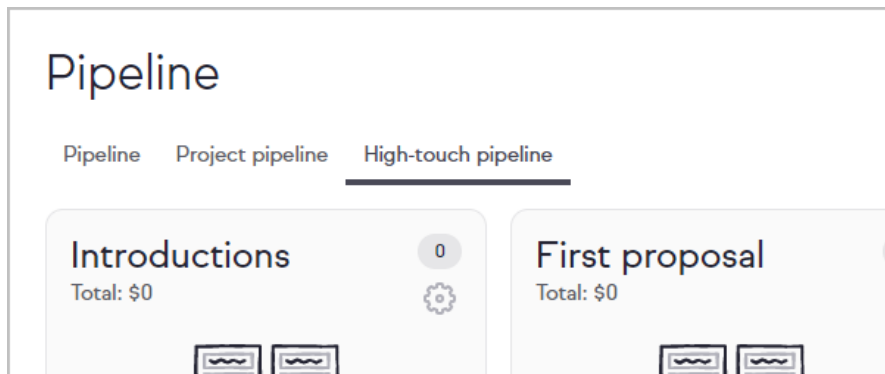

4. Decided if you want to use a template or create a custom pipeline and click **Get started**

5. Give your pipeline a name and customize the names and number of stages within the pipeline

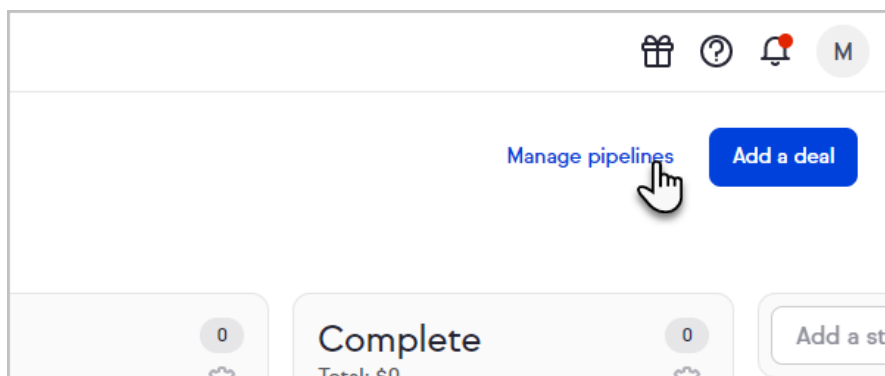

6. Click Save and your new pipeline will be created

## Delete a pipeline

1. Click Manage pipelines

2. Click Delete pipeline

**Pipelines**  
Rename or delete your pipelines.

<input type="text" value="Pipeline name*"/> Pipeline	Delete pipeline
<input type="text" value="Pipeline name*"/> Project pipeline	Delete pipeline
<input type="text" value="Pipeline name*"/> High-touch pipeline	Delete pipeline

3. Select whether existing deals should be deleted or moved to another pipeline

Delete deal  
 Move deal to another pipeline

Choose stage

Pipeline

Project pipeline

4. Click Delete pipeline

What would you like to do with this deal?

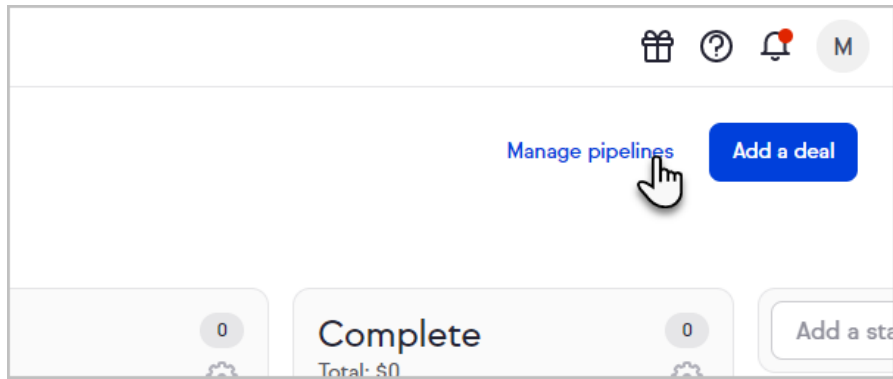

Delete deal  
 Move deal to another pipeline

Choose stage

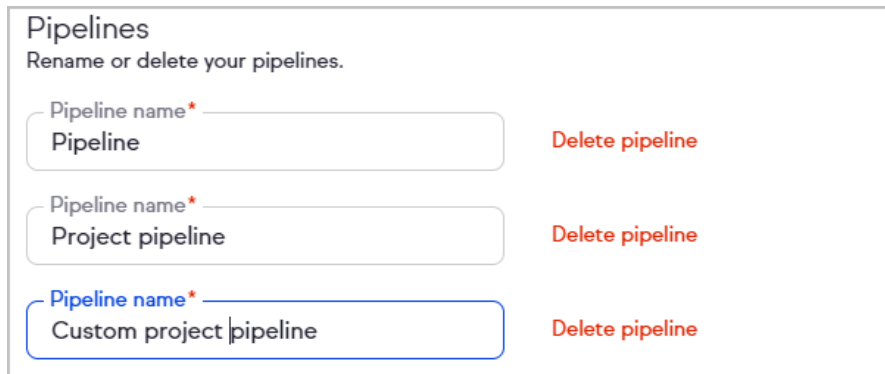

Delete pipeline

## Rename a pipeline

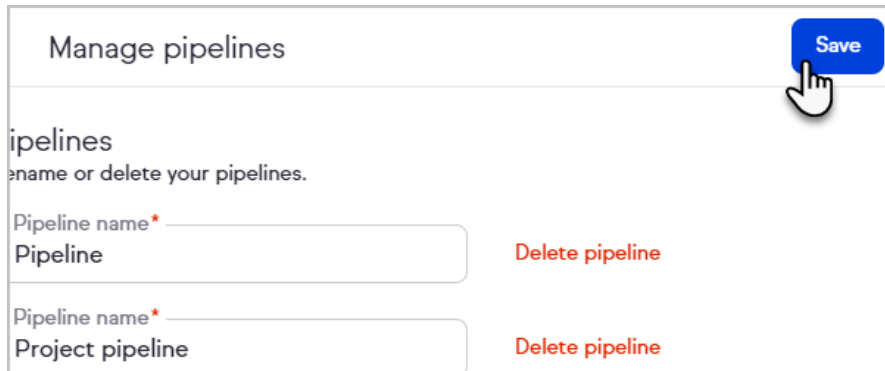

1. Click Manage pipelines

2. Edit the name of your pipeline

3. Click Save

## Pipeline to-dos

If multiple pipelines are added and there is a deal that has an outstanding task, there will be a dot that displays on the tab until the tasks are completed. This will help you stay on top of deals that need your attention most.

Note that you can hover over the dot to see the number of tasks that need to be completed for that pipeline.
