

# October updates 2019 | Keap

---

This article applies to:

## Pipeline update: Stay on track with task notifications

It takes focus and prioritization to get any new opportunity over the finish line. Now you can see which deals need your attention with task notifications. Any time you configure a Pipeline task, you'll see a small red notification. [Learn more.](#)

## Broadcast list view

This new user interface allows you to quickly scan and find the list of broadcasts that have been sent, scheduled, or drafted. By moving all your broadcasts into one view, you will also not have to navigate between multiple pages to find drafts versus sent broadcasts. [Learn More.](#)

## Multiple pipeline to-dos

Always know which pipelines need your attention with the new pipeline to-do's feature. [Learn more.](#)

## Keap Mobile Business Line: Missed call auto-response

Convert more leads by quickly and automatically responding to missed calls so you can look professional and responsive. [Learn More.](#)

## Adding contacts from your mobile device

You can now add your contacts from your mobile device directly to Keap. [Learn more.](#)

## SmartForms update: Introducing form-only

## fields

Form-only fields can now kick off Campaign Builder automations, saving you from using your custom fields. Find them in your SmartForms field options. [Learn more.](#)

## Campaign Builder update: Improved builder canvas

Campaign Builder is easier to use with enhanced canvas navigation. Updates include single-click expanded menu options on each item, easier canvas dragging, and quick item duplication. [Learn more.](#)
