Smart Forms: Add a note to a contact record

Want to capture some additional details when adding Smart Form contacts? Of course you do. Now you can add a notes field right from the form rather than having to go to the contact record to add additional details later. When creating or editing a Smart Form, select **Add fields > Internal > Add note** to include a field for contact record notes. Hooray for better context!

Bug Fixes

- In email notifications sent to some Keap users with Gmail addresses, the text for buttons was very similar to the color of the button making the text difficult to read.
-
