

Legacy Landing Pages - Revision manager

This article applies to:

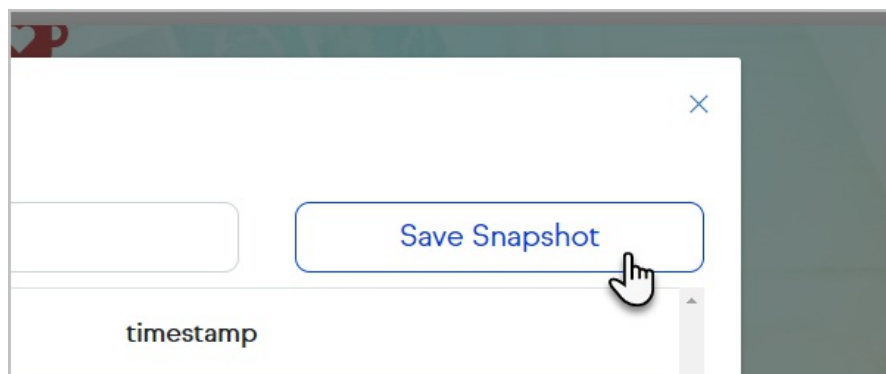

Landing page revisions allow you to take a snapshot of your landing page, make as many changes to the landing page as you'd like, and then revert back to the snapshot. You can use revisions to test out new styling or big changes to a landing page without losing your current page. A snapshot will automatically be taken each time you publish your landing page.

Create a snapshot of your landing page

1. In the landing page builder, click the **Revisions** button in the top-right corner of the builder

2. Enter a Snapshot Description to easily identify the version of the landing page
3. Click **Save Snapshot**

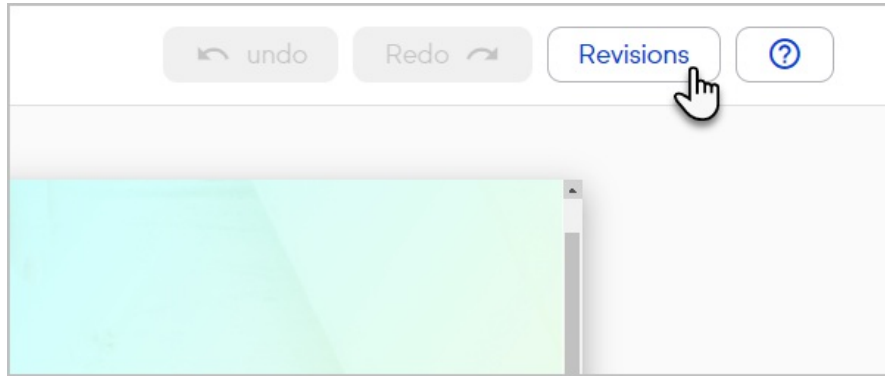

4. A new line item will be added with the user who created the snapshot, their description, and a timestamp of when the snapshot was taken.

user	description	timestamp	
michael@keap.com	New branding test	2020-06-15T17:48:21.022Z	restore

Restore a snapshot of your landing page

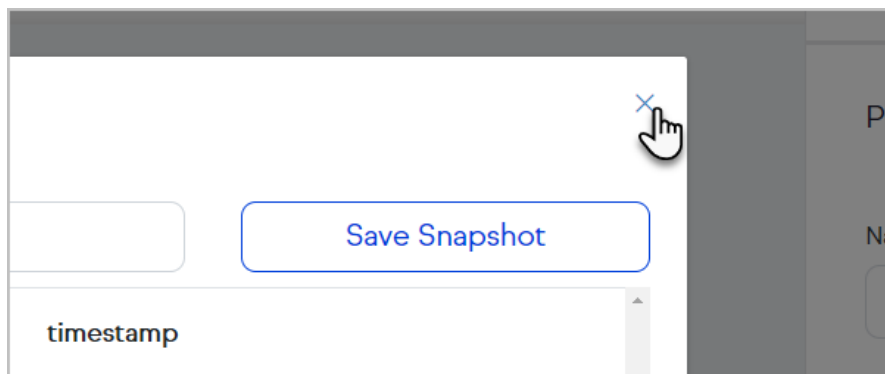

1. In the landing page builder, click the **Revisions** button in the top-right corner of the builder

2. Click **restore** next to the version of the landing page you would like to restore

3. Close the revisions manager to return to your landing page

Automatically created snapshots

Each time you **publish** a landing page, a snapshot will be created at the time of publish.

description	timestamp	
published the site	2020-06-15T19:59:34.111Z	restore

If you attempt to **navigate away** from the landing page builder you may see a

popup warning that changes may not be saved.

This will create a snapshot with the description "closed the browser tab".

description	timestamp	
closed the browser tab	2020-06-15T19:53:41.902Z	restore
New snapshot	2020-06-15T17:51:49.000Z	restore
