This article applies to:

Contact Record update: Better organization for your activity feed

Contact records have a fresh new look. See your activity grouped by type, and quickly take action based on what's most important. If an invoice is overdue, you missed a message, or have overdue tasks, you'll see those items first. [Learn more](#).

Money update: Contact information for Stripe transactions

Your Stripe payments now include your contact's name, address, email address, and phone number on the Stripe dashboard, making it easier to understand who made a payment when comparing your records from Keap. [Learn more](#).

Bug fixes

- When using the Infusionsoft API, attempts to update an existing contact's social account fields using the PUT call would not update those fields. ([Known Issue 2090861](#))
