This article applies to:

Easy Automation

Automating your repetitive tasks just got as simple as “when” and “then”. For example, when someone fills out your lead form, then Keap can send them a welcome email. Or assign you a task. Or both. Or... Well, let’s just say there’s a lot more. [Learn more.](#)

Contacts update: Your chronological activity feed returns

Sometimes you need to see exactly when an activity occurred or key activities a contact completed on a given day. The chronological activity feed on your contact record will let you see the recent history of a contact broken down day-by-day. [Learn more.](#)

Campaigns update: Remove a contact from a sequence

Keep your campaigns neat and tidy by removing a contact from a sequence with this new option in the “Add to sequence” process. Whether you’re moving the contact to another sequence or just want to pull them out of sequence itself, this will do the trick. [Learn more.](#)

Bug fixes

- Booked appointments could not be viewed or edited. These appointments also failed to display on the contact record. ([Known Issue 2142637](#))
