

Legacy Landing Pages - Social share settings

This article applies to:

The **Social Share Settings** in the landing page builder gives you a simple editor to format your landing page preview without the need to know Facebook's [Open Graph](#) markup language. A social share has four components:

- Image
- URL
- Title
- Description

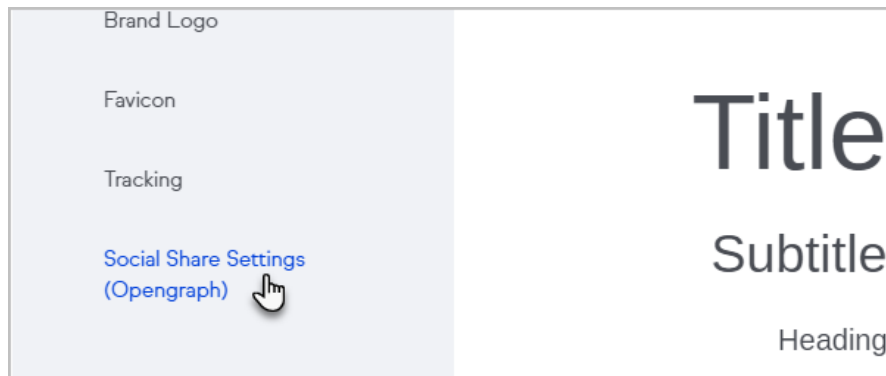

Pro-Tip! [Click here](#) to view Facebook's best practice guide in order to learn things like how to optimize your image for the highest viewing quality!

1. To view your current Facebook Share, navigate to the landing page builder and open the **Settings** menu

2. Click **Social Share Settings (Opengraph)**

3. Enter a title, URL, and description

A screenshot of the 'Social Share Settings (Opengraph)' form. The form has a title 'Social Share Settings (Opengraph)' at the top. Below the title are three input fields: 'Title:', 'URL:', and a larger text area for a description. The description field contains the placeholder text: 'Add a short description that will show up in social websites like facebook when you share'.

4. Click **Add an image** to select an image from your Company Images or upload one from your device

A screenshot of the 'Add an image' button in the social share settings form. The button is green with white text and a hand cursor icon pointing to it. It is located below the description field in the form.

5. Click **Done**
 6. Publish your landing page
 7. Share your landing page link on social media
