Money update: Invoices are easier to create, customize, and share

You now have more options when it comes to creating and sharing invoices with your customers. Edit product prices and quantities, and update payment methods in line. You can also preview your invoice once it's ready to share, and then send it via email or text (Keap Business Line required), or copy a direct link to the invoice. [Learn more.](#)

Stripe payments are now 3D Secure 2 compliant

Great news for our customers processing payments in the Europe Economic Area (EEA). Our Stripe integration now meets Strong Customer Authentication (SCA) requirements with a 3D Secure 2 flow that will authenticate transactions as needed, ensuring you will not see any compliance-related payment failures when using Stripe in 2021. [Learn more.](#)

Bug fixes

- The email authentication page sometimes displays "We were unable to verify your email domain" when the domain is actually verified. ([Known Issue 2225207](#))
 - Contacts imported with a birthday did not include the first two numbers in the birth year.
-
