

This article applies to:

## Dashboard update: Customizable dashboards for each user

Every user in your app now has their own individual dashboard which can be customized to put the information they need front and center. Add, remove, or rearrange your dashboard widgets just how you like them without impacting your colleagues. [Learn more.](#)

## Money update: Status messages for failed recurring payments

You have more insight into the status of your recurring payments. Whenever a recurring payment fails, you'll see an error message on the Recurring tab of your Money page. This information can help you know when you need to reach out to your client to complete a payment. [Learn more.](#)

## Advanced Automations update: Product purchased goal enhancements

The product purchased goal now has the option to select multiple order forms or products in a single goal. Plus, the goal's Payment type setting has a new option for "Any payment types" to account for all the ways you get paid. [Learn more.](#)

## Bug fixes

- Internal forms that included a Country field couldn't be republished after saving the form and exiting the builder. ([Known Issue 2376099](#))
