This article applies to:

Money update: Checkout Forms now available in Keap Pro

Now it's easy to collect more money online. You can build a custom Checkout Form to sell your services and products online, then embed it on your website or share it with your customers. Plus, you can sync your Checkout Forms with Keap's automations and native payment processors like Paypal and Stripe. [Learn more.](#)

Forms update: Public form headlines

Make the purpose of your public forms clear with a headline. Each public form now has the option to include a headline that displays at the top of the form. Your existing public forms will use your business name as their headline to prevent unexpected changes. [Learn more.](#)

Contacts update: Filters for birthday and anniversary dates

You have more options for filtering your contacts and creating lists with the new birthday and anniversary options. [Learn more.](#)

Bug fixes

- On the Appointments page, users with more than 10 appointment types would not see all of their appointment types listed. ([Known Issue 2425846](#))
 - The island/state of New Providence was not listed in the State dropdown for The Bahamas.
-
