# Groups widget 🔗

This article applies to:

Pro and Max users can create a group widget to keep an eye on the size of your lists and dig in straight from your dashboard.
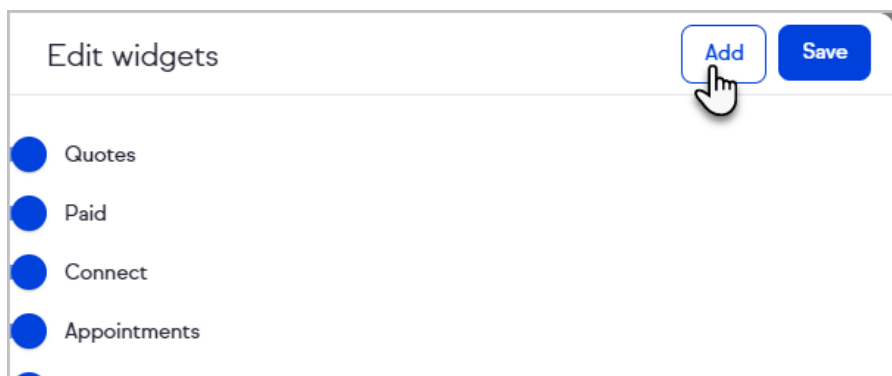

## Create a group widget

1. Open the more menu on any widget

2. Click **Manage widgets**

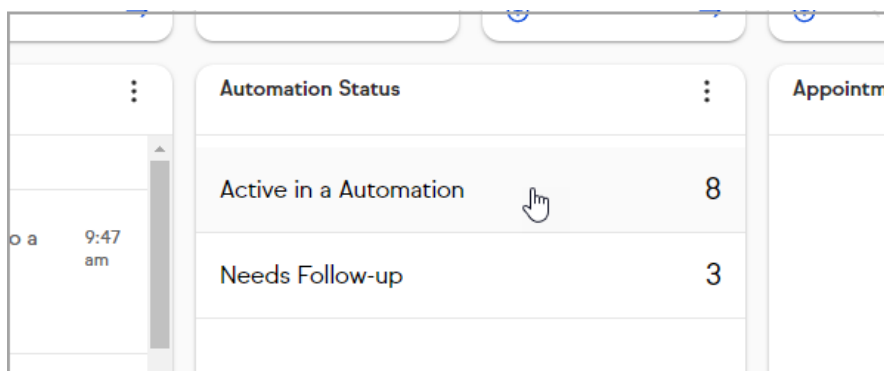

3. Click **Add**

4. Click **Groups**

5. Enter a name for your widget and select the group(s) to include in the widget

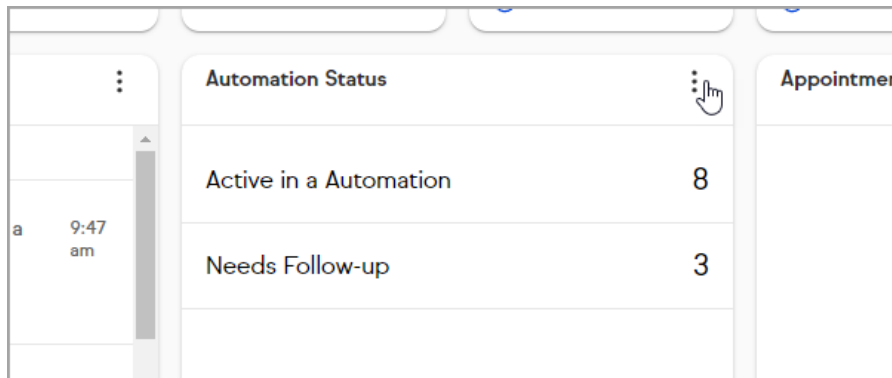

6. Click **Save**

7. Click any **group** on your new widget to view the contacts in that group

## Share a group with other users

Admin users can share contact lists with other users in their app.

1. Create a group widget

2. Open the more menu on the group widget you want to share

3. Click **Share widget**

4. Select which user(s) to share the widget with

5. Click **Update widget sharing**

6. The widget will be added to each user's dashboard
