New suggestions for automating forms

You will see Easy Automation recommendations when creating a new form to help you automate your follow-up for new leads. [Try it now.](#)

Bug fixes

- In Pro or Max, recurring invoices were not generated if the initial payment was cash or check
 - Some users were unable to connect their Google My Business account
 - If you created a custom field in a contact, it would delete any existing information in the "Spouse name" and "Nickname" fields
 - Forms that had mandatory dropdown, yes or no, or day of week custom fields could be bypassed and a form could be submitted even if they were blank
-
