This article applies to:

## New email builder for Pro and Max

The new email builder that exists in Keap Lite will be released in Pro and Max. This new builder provides a set of professional, modern templates that are easy to edit and to send. [Learn more.](#)

## Landing Pages for Pro & Max

Similar to the new email builder, you can now create and manage landing pages outside of Advanced Automations. Max users will also be able to build Landing Pages with multiple steps. [Learn more.](#)

## Easy Automations for appointments

It is now simpler to automate processes for appointments because you can now add automations as you create an appointment booking link. [Learn more.](#)

## Email sync recommendations

There is now additional support when emails aren't syncing as expected. We will give you helpful next steps to resolve any connection issues. [Learn more.](#)

## Bug fixes

- Contact lists in Keap were not displaying correct results
  - When an invoice was marked as paid in Quickbooks Online, the invoice would still show as a draft in Keap
  - Invoice line items could not be edited once a payment was made
  - In some instances, a previous invoice would display while creating a new invoice
-
