## Bug fixes

- Subscription management changes were discarding pricing defaults when trying to update or change your subscription
  - When logged in as a staff or manager user, you weren't able to access or edit your email signature
  - For apps with a UK date format, scheduling broadcasts with the new email builder on or after the 13th day of the month would cause the email to fail to send
  - When trying to send an email from the new builder, inactive users were displaying in the list of users to send a test email broadcast to
-
