

# Checkout Forms Automation

This article applies to:

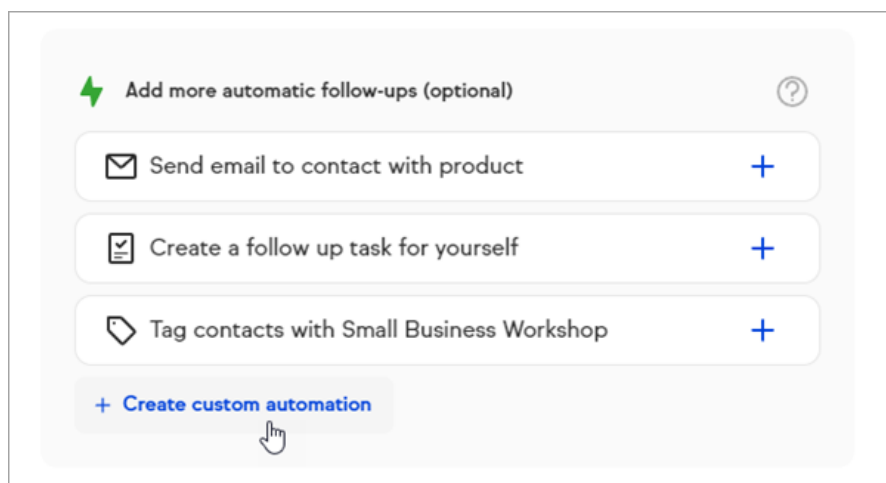

You can quickly set up automation when someone submits payment on a checkout form in one of two ways: On the checkout form itself, or you can set it up under the Easy Automation section

On the form itself:

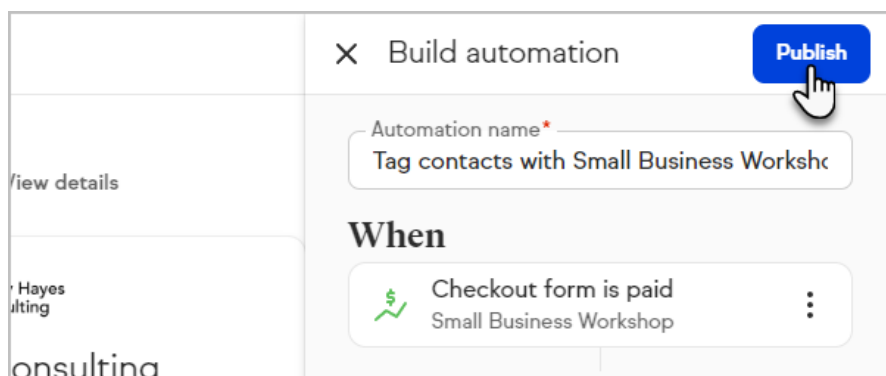

1. Go to the **Automate** section of the checkout page creation tool

2. You can start by choosing one or more of the example automations, or click the button at the bottom to create a custom automation

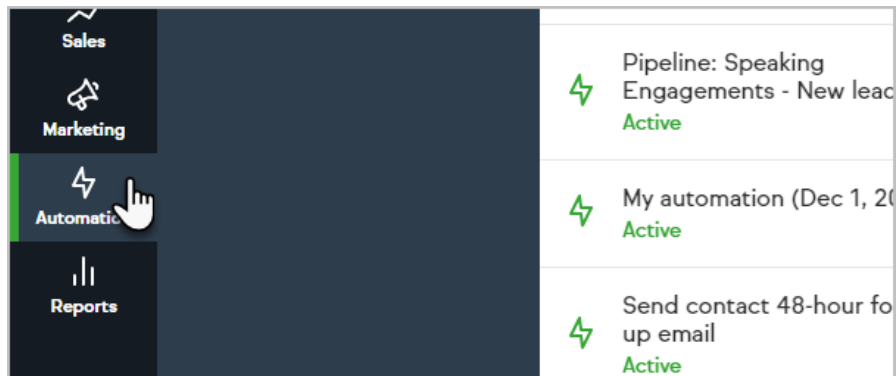

3. Once you've added and configured your automations, just click the **Publish** button.

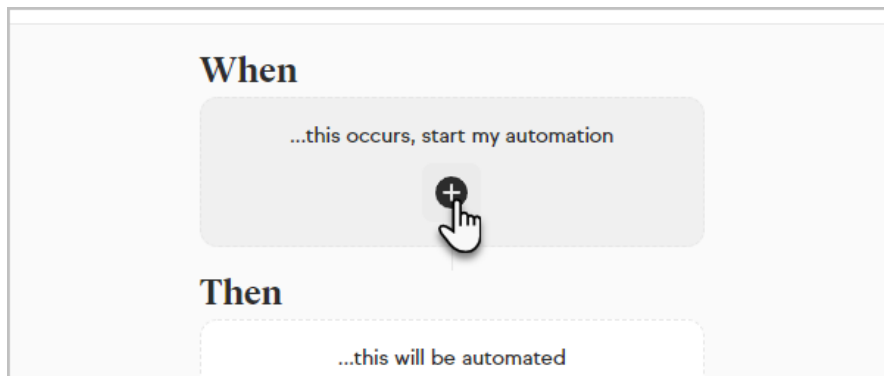

## In Easy Automations

1. Go to Automations

2. Open an existing easy automation or create a new one
3. Click on the **When** state

4. Select the **When checkout form is paid** option and choose the form that you want to automate
