

# Add a file download link

This article applies to:

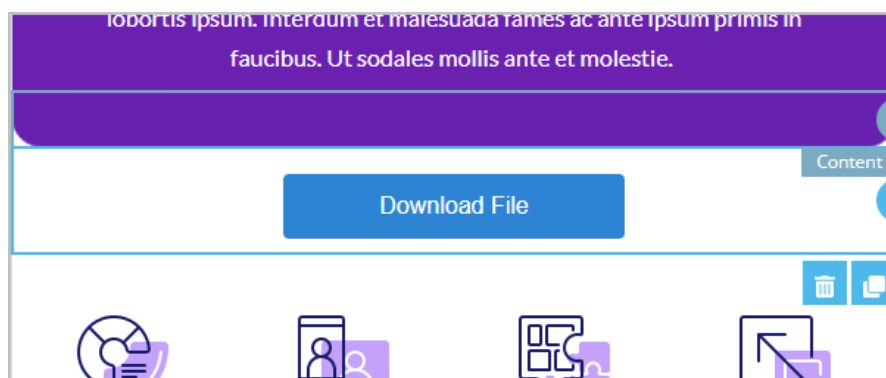

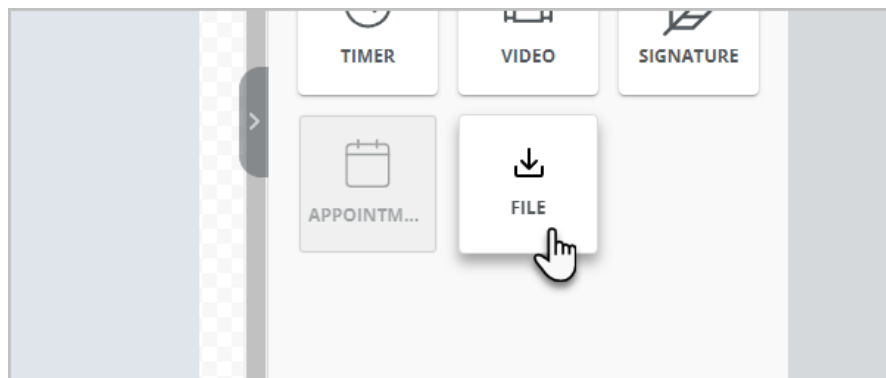

Pro

Max

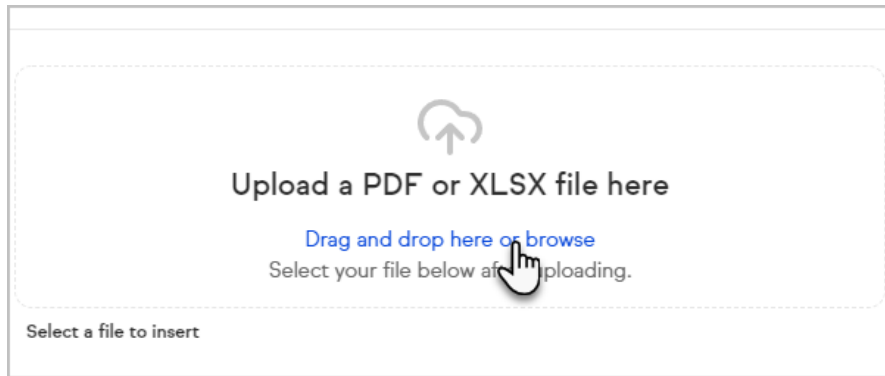

You can now upload specific file types and link to them in the Email Builder so your prospects and customers can download the hosted file.

- Currently, we support PDF and XLSX file types
- This feature is available when building a **Broadcast** email or when building an email in **Advanced Automation**.
- The file size limit is 10MB

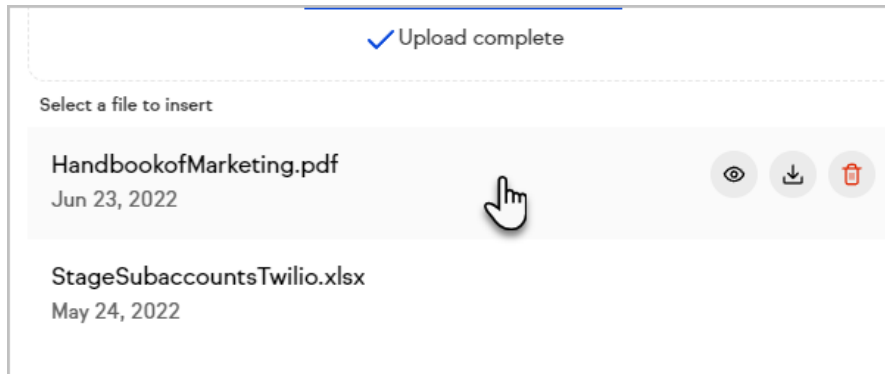

1. Click and drag the new **File** object into your email template

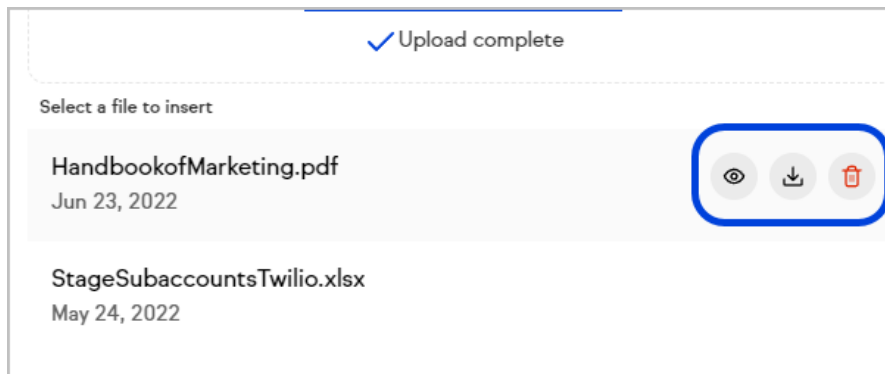

2. In the panel on the right side of the page, click **Open File Manager**
3. Drag and drop or click to upload your file

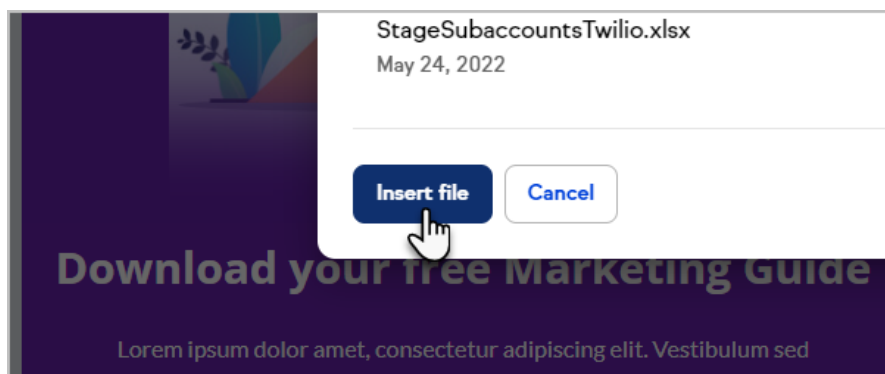

4. Select your new file from the file list.

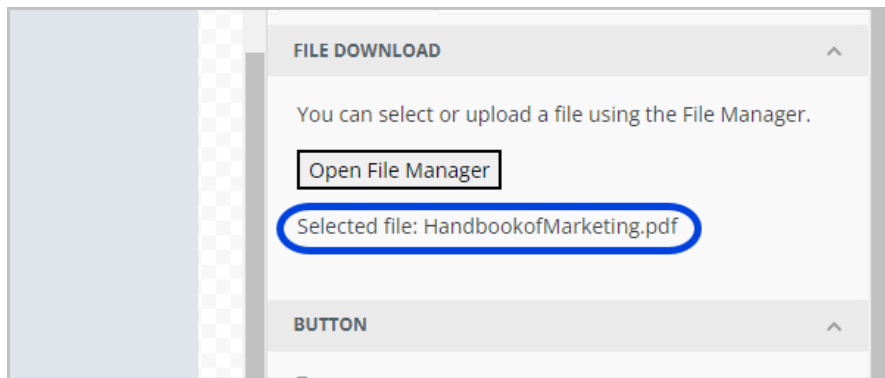

5. Note that you can preview, download or delete individual files

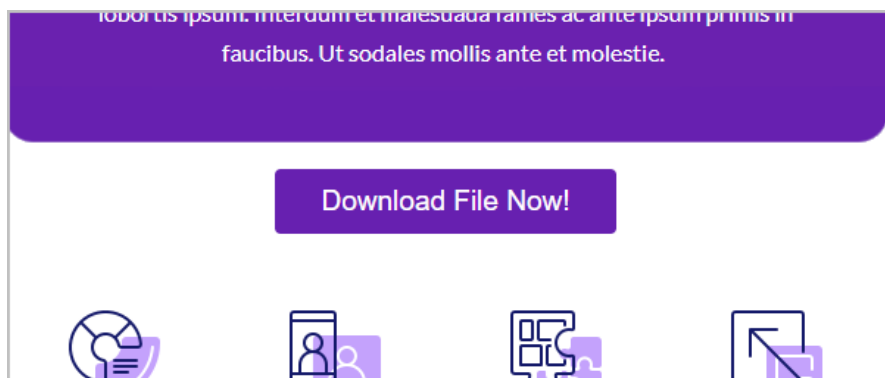

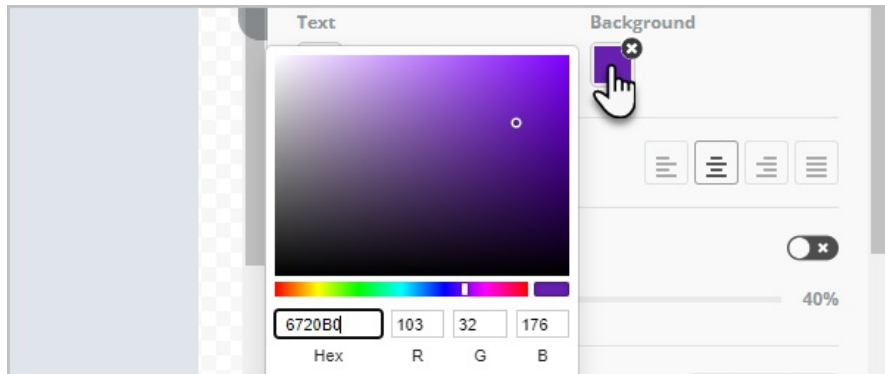

6. Click the **Insert File** button

7. Note on the panel on the right hand side, you can see the file that has been selected

8. Style your download button to match your template

9. That's it!
