New mobile app version

This new app version 2.9.2 will no longer support the free product as an option. It provides an upgrade path for existing free users. Mobile users who choose to upgrade will have the option to upgrade to the \$9.99 mobile edition for now. On 7/30/22, any free users who have not upgraded will have their accounts deactivated and lose access to the mobile app.

Bug fixes

- After sending an initial individual email from a contact record, subsequent individual emails that were sent wouldn't open.
- Decision Diamonds were not updating custom field choices when changes were made to the fields from a form or landing page
