1. File upload and download from an advanced automation email

2. Bug fixes

File upload and download from an advanced automation email

You can now upload specific file types and link to them using the File button within Advanced Automation emails so your prospects and customers can download the hosted file. Learn more

Bug fixes

- Users were unable to reschedule a Keap appointment without canceling the entire appointment and re-booking.

- For some orders paid via 3DS with Stripe, a duplicate payment was being recorded in the Keap order with only one payment in Stripe.
