Multiple forms on landing pages

You can now add multiple forms onto a single landing page. For example, you may want to have unique lead capture forms for different scenarios on the same landing page. [Learn more.](#)

Bug Fixes

- Button links were not applying tags or tracking for emails built with the New Email Builder.
 - While editing or adding a recurring product on a checkout form, the option of "Never" does not save.
 - When submitting a landing page that includes a form with a website field, if you did not add "http://" before the web address, the submit fails with a 400 "Website url is malformed" error message.
 - You were unable to type or select a date in a date field on a landing page if using an iOS device.
-
