Updated Contact Import Page

The contact import page has been reorganized to help you more quickly find the spreadsheet option. We have also organized the overall layout of the page to make it more visually appealing. [Learn more.](#)

8 New holiday email templates are available!

Bug Fixes

- Some users were unable to refund some payments which were made via the Stripe merchant integration
- When filtering contacts in Keap, if a the field value includes a "+" sign the filter shows 0 results
- When an automation email is configured to send from a specific user, and the email 1 field on that user's record is changed, the from field in the email builder becomes deselected
