

Creating a sub-Stripe account

This article applies to:

[Pro](#)

[Max](#)

Keap has upgraded its service with Stripe and this upgrade requires some action from you. Completing this action will create a sub-Stripe account under your main Stripe account that funnels all of your Keap-related transactions through it. Doing this does not impact any of your available funds, deposits, or pricing with Stripe. This also ensures that you will not experience a lapse in your ability to take payments and it also makes it so that you're able to take advantage of future improvements that we release.

Upgrading this connection requires you to log into your Keap account and navigate to the payment processing page. You will then click "Upgrade" as seen below to start the process. It will take you through a sub-account creation process and should take no more than 10 minutes to complete.

Please complete this action before May 1, 2023.

Payment processing

This is where you can manage how you will collect payments from your clients. All Keap accounts are automatically enrolled to accept payments, but we may need some additional information so you can receive the payments you collect.

⚠ To better serve you, Keap has upgraded its service with Stripe. This will require you to disconnect your existing Stripe account within your Keap app, and reconnect your new Stripe for Keap account. Please complete this process by May 1. [Learn more](#) Upgrade

stripe Stripe
2.9% flat rate + 30 cents transaction fees, no hidden fees. Fees for Non-US transactions may vary.
