

Solution Launchpad - support for Tags[®]

This article applies to:

This document outlines what is included when a tag is installed from one app to another, using Solution Launchpad.

1. [What's included?](#)
2. [Behavior notes:](#)

What's included?

The following data is included when installing a tag:

- Tag Name
- Tag ID
- Tag Category
 - Tag Category Description
- Tag Description

Behavior notes:

- If a tag was previously installed to an app, it will not be re-installed as long as the same tag still exists in the destination app.
 - **Note:** This only applies to tags installed via Solution Launchpad. If a tag being installed happens to match a tag that was already created in the destination app, a duplicate tag **will be created**.
 - Subsequent installations of the same field **do not update** the field in the destination, even if something has changed.
-
