

Exciting News: New REST v2 API Endpoints Launching July 1, 2025!

Last modified on: 06/11/2025 5:28 am MST

We are thrilled to announce a significant expansion of our API offerings! On July 1, 2025, we will be releasing approximately 200 new REST v2 API endpoints. These endpoints are designed to provide value parity with our existing XMLRPC endpoints, giving you more flexibility and powerful tools to integrate with Keap.

1. Where to Find the New Endpoints
2. What Does This Mean for You?
3. Need Help? We've Got You Covered!
4. Why the Change?

Where to Find the New Endpoints

You can explore the full list of these new endpoints and their documentation at the following link:

<https://developer.infusionsoft.com/docs/restv2/>

What Does This Mean for You?

These new REST v2 API endpoints are intended to provide you with more modern, secure, and efficient ways to interact with Keap. They align with industry best practices and offer improved performance and scalability.

We encourage you to explore these new endpoints and consider using them in your integrations where applicable. They will help you take full advantage of Keap's capabilities and streamline your development workflows.

Need Help? We've Got You Covered!

We understand that adopting new APIs can sometimes come with questions. We have prepared extensive documentation to help you get started:

<https://developer.keap.com/resources/>

In addition to the documentation, we are excited to offer a live interaction Q&A session where you can get direct assistance from a host of API experts, including our very own API team members, will interact in this forum to answer your questions and provide guidance.. Join us here:

Why the Change?

This release marks a significant step in our ongoing effort to enhance our API offerings and provide you with the best tools possible. By introducing these REST v2 endpoints, we are moving towards a more robust and future-proof API ecosystem.

We are committed to supporting your integration needs and ensuring a smooth transition. We believe these new endpoints will greatly benefit your development efforts and empower you to achieve even more with Keap.

We look forward to seeing what you build with these new capabilities!
